

Your Important Information — All in One Place

Web-based system facilitates paperless communication between pole owners and attachers. Notify™ streamlines the joint use request process by allowing attaching companies to self-service.

One central platform to manage joint use communication.

- Store Pole Details
- View Important Contacts
- Manage Billable Items
- Access Partner Company Info

Stay Informed

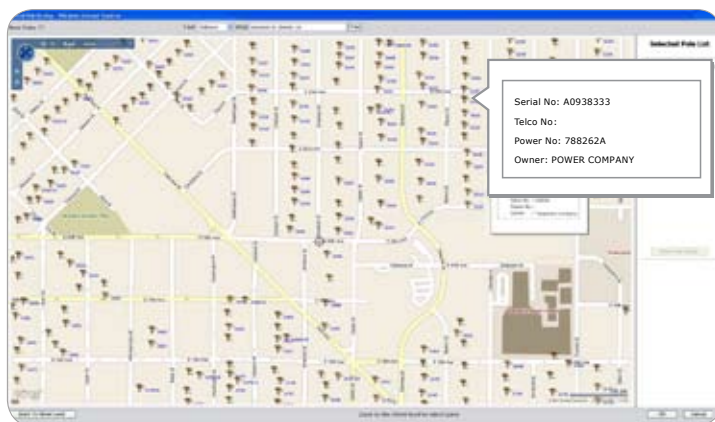

Working more intelligently improves productivity. Notify™ sends work order updates via email. These automatic reminders keep transfers, attachment requests and make-ready work on-track.

Manage Billable Items

Manage fees, permit costs, inspections, pole replacement costs all within each work request or "conversation."

Keep in Touch

Designate contacts for each job and improve coordination of work requests between you and your joint use partners. Build in supervisor-employee hierarchies for workflow escalations in Notify Pro™ .

Easily select a pole or group of poles when attaching in Notify™

Start up a conversation in Notify™
The only cross-industry network for Joint Use.

Seamless communication. Unbelievable price.

Flexible Workflows

At Alden, we know one size does not fit all. Route projects through workflows customized for each of your partner companies. For even more control, Notify Pro™ easily adapts to your internal processes and requirements.

Dynamic Reporting Capabilities

Generate a custom report for current work orders and easily view the status of all your on-going projects.

Complete Historical Records

Store archival documentation of ALL owner/attacher communications, including negotiations and agreements.

Eco-Friendly Paperless System

Notify™ uses a paperless process and can reduce paper costs, as well as your company's eco-footprint.

Available in Two Versions - FREE & PRO

Notify™ is offered in two versions. A FREE version for basic users and a PRO version for customers who prefer greater customization.

**Talk is cheap,
Communication is Free.**
