

JOIN THE HERO SUPPORT TEAM!

Electric & Telecommunication Utility Professionals are often the unsung heroes in the communities where we live and work! They keep the lights on, the internet working, the phones ringing and work tirelessly building robust infrastructure that meets today's needs and tomorrow's challenges. While often going without thanks, they still take pride in a job well done. These are the kind of heroes our community will always need. And while not everyone is called to do that work, you could play an essential role on a team that supports them and become a hero in your own way.

Alden is searching for a Senior Software Developer to join our mission of uniting utility professionals working towards common goals on shared assets. Whether inside or outside of those organizations, any way they think about assets, Alden enables everyone to work better together. This collaboration leads to faster deployments and better infrastructure, which leads to thriving communities. This is one way that we can have a positive impact on our communities and make the world a better place.

ABOUT ALDEN

Our Vision is one collaborative software platform for structure owners, attachers, occupants, and service firms that facilitates activities and enables data driven decisions. Business process automation that solves deep niche problems, providing intrinsic value inside the company. One source of truth for the industry to coordinate from, providing cross company network value. Technology to enable complementary services that further brings together people in the industry

To be a member of our team you must:

- Have Integrity
- Be Innovative
- Pursue Excellence
- Approach challenges with a Can-Do Attitude
- Be Driven to Learn and Grow
- Be Accountable
- Treat Others and the Company with Respect

SUMMARY

The responsibilities of senior developers include writing code, analyzing data, and contributing to the design and implementation of software. To be successful as a senior developer, you should demonstrate great skill in creativity and innovation, ability to thrive in a high-pressure environment, and possess excellent communication skills. A top-notch senior developer should have extensive

experience in software development, effectively manage deadlines, and demonstrate strong analytical skills.

Senior Software Developer

SALARY RANGE:

\$97K – \$130K / annual

JOB DESCRIPTION

This role's responsibilities include:

- Designing and implementing end-to-end solutions using C#, ASP.NET, and Angular.
- Developing responsive and intuitive user interfaces using Angular, HTML5, CSS, and related technologies.
- Building scalable APIs and services using C#, ASP.NET, and SQL Server.
- Identifying and addressing performance bottlenecks across the stack.
- Collaborating with architects and other developers to establish technical designs and provide guidance on best practices.
- Implementing security and data protection measures.
- Participating in code reviews to ensure code quality and adherence to coding standards.
- Following the Agile Scrum Methodology principles and values that guide the software development process.

NOTEWORTHY BEHAVIORS

Casual with rules	Comfortable with risk
Persistent	Can delegate details
Casual	Light emphasis on doing things "by the book"
Stable	Some emphasis on independence

OTHER QUALIFICATIONS

- **Technical Skills:** Proficiency in C#, ASP.NET Core, Angular (versions 8+), TypeScript, HTML5, CSS, and JavaScript.
- **Database Skills:** Experience with relational databases and proficiency in SQL.

- **Architecture:** Strong understanding of software architecture and design patterns.
- **Agile Methodology:** Previous experience working in Agile/Scrum environments.
- **Problem Solving:** Ability to quickly diagnose and solve technical problems.
- **Education and Experience Required:**
 - 4-year college degree in software or technology.
 - 5 years' work experience in software development.
- **Due to the sensitive nature of our utility work, you must:**
 - Be a U.S. citizen located in the U.S.
 - Pass a background check and drug screen.
- **Location** – Hybrid; will need to be in Birmingham, AL office at least once a week, and as needed for other meetings.
