Mobile Software Developer

JOB DESCRIPTION

A mobile developer is responsible for translating code into user-friendly applications. They collaborate with internal teams to develop functional mobile applications while working in a fast-paced environment.

Mobile developers develop application programming interfaces (APIs) to support mobile functionality while keeping up to date with terminology, concepts and best practices for coding mobile apps. Essentially, mobile developers contribute to the design, testing, releasing and support of the application.

- Understands Agile practices and how to communicate within that framework
- Is able to break down highly technical challenges, determine best practices and implement the solution
- Responsible for on time delivery during a sprint
- Understands how to break large stories into bite size pieces and create unit tests for each piece
- Responsible for implementing application designs to meet customer needs and the design is easily extended to evolving customer needs
- Write code to develop and enhance mobile apps to ensure robustness and scalability
- Ability to interact with internal teams and likes being part of a team

SUMMARY

The focus of this job is on achieving results which are aligned with the larger picture of the organization and its strategic goals. Initiative, coupled with a sense of competitive drive, and the ability to stay focused on results despite changing conditions, is the key to achieving the performance objectives of this job. Because environmental and organizational conditions change rapidly, the work involves innovation and creativity in generating ideas for quick response. Decision-making is focused on implementing practical, timely solutions.

The job requires getting things done quickly and handling a variety of activities. Self-assurance, and the confidence to purposely drive toward results while constantly problem-solving and engaging the commitment of others is essential. A leadership style that is firm and goal oriented, and yet motivates, trains, and engages others in an enthusiastic way is important. The emphasis on building rapport and relationships with individuals and groups requires an outgoing, poised and persuasive communication style. Because the pace of the work is faster than average, the ability to learn quickly and thoroughly while continually recognizing and adapting to changing conditions is critical.

The scope of the job may require effective delegation to proven people. Especially routine and repetitive details should be delegated but with responsibility for follow up and accountability for timely results. While the job requires the ability to act independently, a sense of urgency and the confidence to handle a variety of challenges, a full commitment to the success of the business and high standards of achievement are expected in this position. The emphasis is on results, and effective systems that achieve results through and with people, rather than on the details of implementation. The job environment is flexible, constantly changing and provides growth opportunity, recognition, and reward for the achievement of business results.

JOB CHARACTERISTICS

- Sense of urgency for goal achievement. Varied activities. Multiple, simultaneous projects. Multi-tasking Fast-paced environment.
- Results focus Idea generation, innovative and creative problem-solving. Rapport and relationship building focused on achieving results Engage commitment of others.
- Problem solving orientation.
