

Central Asset Database for Poles, Conduit & More

Asset Management + Activity Engine

Asset Management Module

Create, update, search with filters, or delete assets in bulk.

Assets are defined as:

- Standard attributes
- Specific attributes
- Individual assets and in aggregate
- Company-specific details
- Associated photos, documents and notes
- Applicable activities

Point Assets

Point assets refer to places on earth that are typically viewed on a map.

- Utility poles
- Vaults
- NIDs
- Pedestals
- Towers

Linear & Intangible Assets

Linear assets refer to point to point assets, such as point A to B.

- Conduit/ducts
- Distribution lines
- Fiber cable

Intangible assets include:

- Contracts
- Invoices
- Circuits

Geographic Assets

Geographic assets may include land, right of way (ROW), service areas, storm maps, fire zones, or any other boundary-type information.

Activity Engine

Alden One® is a structured workflow process engine that provides streamlined processes and communication with third-party attachers, contractors and with any other key stakeholders within or outside your organization.

Activities are defined as a workflow or steps in a process that include:

- Types
- Attributes
- Process steps
- Audit log - complete historical records
- Applicable assets

Data Sharing & Security

Utilize data sharing in joint use communication, work assignment with contractors, project details with your internal departments and more.

Alden One's data sharing capabilities allow your business to:

- Share assets
- Share activities
- Share one or more asset attributes
- Share one or more process steps

Any Asset, Any Activity.

Alden One® is next-generation asset management software for electric utilities, communications, and broadband providers.

FEATURES

Turn on the feature sets your business needs for data sharing, dashboards and visualizers.

Data Sharing & Security

Security is key. *Share the data you want, only with the people you want to share it with* – within and outside your organization.

Dashboard Analytics

Real-time visibility into the current status of every project at any time.

Platform Hierarchy

User-defined role-based access rights to asset exposure. *Share only relevant data.*

GIS Integration

Alden One® works with your GIS to provide systematic updates to *keep GIS data current and meaningful.*

Billing & Invoicing

Ensure that your business captures ALL revenue and billable items related to assets.

Contract Management

Store and manage all third-party contracts.
